PROBLEM: The unit has been returned without its serial number and an email address, if applicable.

1. Check if the returned unit has a serial number and an email address, if applicable.

2. If the returned unit has a serial number and an email address, if applicable, contact factory service.

3. If the returned unit does not have a serial number and an email address, if applicable, return the unit for service.

SPEED MONITORING

Laser Protection

VG-2 signal is detected, the VG-2 warning will be passed. You may register your Whistler detector for a minimum of 3 seconds.
